**MSc Intelligent Systems (IS), MSc IS & Robotics (ISR)**

**Frequently asked questions:**

Where can I find more details about the courses and the modules etc?
You can read more about it on our web pages www.cse.dmu.ac.uk/msccir which will tell you more about the course.

How do I apply?
There is a link to the on-line application form on this page: http://www.dmu.ac.uk/study/courses/postgraduate-courses/intelligent-systems-and.robotics-msc.aspx you just need to follow the instructions and send scanned copies of the various certificates etc. Also, you can contact our admissions team directly by emailing pgtech@dmu.ac.uk they can help you if you have any queries regarding the application process.

What is the difference between the 2 courses?
There are 2 variants of the course: the MSc Intelligent Systems and the MSc Intelligent Systems and Robotics. They only differ by one module: where the former has a Data Mining module, the latter has a second Robotics module. It doesn’t matter which one you initially enrol for.

Who teaches on the course?
The course is delivered by staff members of the Centre for Computational Intelligence http://www.cci.dmu.ac.uk/

What study methods are available?
You can study the courses either as a full time student onsite, a part time student on site or as a part time distance learning (DL) student.

What are the fees?
2012/13 - fees are given this page: http://www.dmu.ac.uk/study/courses/postgraduate-courses/intelligent-systems-and.robotics-msc.aspx (click on the ‘fees and funding’ link.)
If you are studying part time (either on site or at a distance) you will be billed for the number of modules you plan to study within a particular academic year. To find out the (approximate) cost per module, divide the appropriate total (given in the previous paragraph) by 12 (there are 8 taught modules plus a project that is equivalent to 4). You pay for the modules when you enrol on them.
